

Hidakacho Tsunami Hazard Map 2 Monbetsuhoncho District

Key

- Designated emergency evacuation areas
- Designated evacuation shelters
- Welfare evacuation shelters
- Municipal Disaster Management Radio Communication Network
- Fire station
- Police
- Hospitals & clinics
- Town hall
- Heliport
- High-Standard Highway
- National route
- Prefectural route
- Railway
- Administrative boundary
- Town boundary

Monbetsu Honcho				
Maximum tsunami height (T.Pm)	Start time of effects		(Reference)	
	±20cm	+20cm	First wave	Highest wave
13.1m	12min	30min	36min	143min

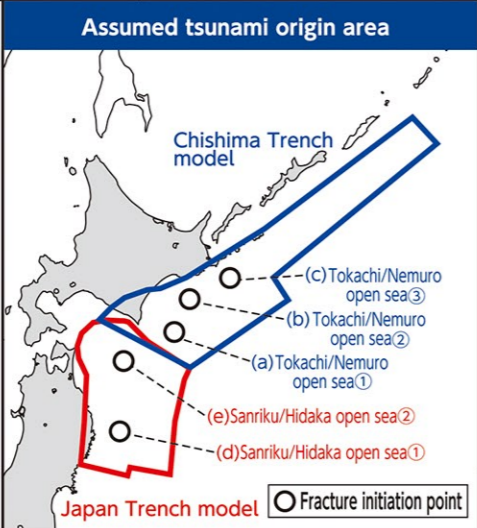

Expected tsunami inundation area (Maximum inundation depth) (m)

- 10m and above – less than 20m
- 5m and above – less than 10m
- 3m and above – less than 5m
- 1m and above – less than 3m
- 0.5m and above – less than 1m
- 0.3m and above – less than 0.5m
- less than 0.3m

Predicted length of time before a water level change of ±20 cm starts at a depth of 10m offshore
 *The length of time before the 1st wave reaches land and the highest water level

Name of place where measurement is taken				
Maximum tsunami height (T.Pm)	Start time of effects		(Reference)	
○.○m	○○min	○○min	○○min	○○min
○.○m	○○min	○○min	○○min	○○min

±0.2m: Start time of effects
 First wave: Arrival time of first wave
 Highest wave: Arrival time of highest wave

Bird's-eye view
 Earthquakes / tsunamis
 Storms and floods / sediment disasters
 Evacuation behaviour during a disaster
 Receiving disaster information
 Other disasters
 Everyday preparations
 Emergency Survival Kits
 Individual disaster prevention activities
 First Aid
 Evacuation shelters by district
